To Whom It May Concern,

I wish to express support the application for FY22 HUDRD Grant focused on speaking with people who are experiencing homelessness regarding their life experiences and their preferences in exiting homelessness. The information gathered will be critical in tailoring both policy and program development within the State of Iowa. Iowa as a whole is coordinating efforts in addressing homelessness and this collaborative environment is ready to support the efforts of a large state wide study and implement recommendations that result from the study.

[REDACTED] has firsthand experience working with [REDACTED] on conducting both qualitative and quantitative research focused on people who are experiencing homelessness. Their combined strengths and expertise in the area of homelessness should garner excellent study results.

Best,

---
