

## FPM Rolls Out New E-Transit Vans

Facilities Planning and Management has continued to keep sustainability a priority with the adding of five Ford E-Transit vans to our fleet. These vans are 100% electric and will help Drake reduce our carbon footprint.

Fun Facts about the new E-Vans:

- Lower maintenance costs, as much as 40% less than gasoline-powered vans
- Certified as a zero-tailpipe emissions vehicle
- 360-degree camera package and reverse brake assist
- Battery (400V lithium-ion) is located under the body to maximize cargo space and provides 126 miles of range
