<sup>\*</sup>Retention rates include those who have graduated in the cohort.

<sup>\*\*</sup> Each cohort is comprised of full-time, first-time, degree seeking undergraduates (including pre-pharmacy students) in a cohort. This is designated by year and term that they start. The graduation rate is the total number of completers (including pre-pharmacy completion) within a designated period of time (4 year rate would be 100% of normal time) divided by the revised adjusted cohort.
