## AMERICAN SOCIETY OF CONSULTANT PHARMACISTS

The American Society of Consultant Pharmacists Drake Student Chapter is committed to promoting healthy aging in the greater Des Moines area through appropriate medication use. This organization provides the opportunity for students to develop patient care skills to serve the older adult population, and contribute time and resources to activities to promote awareness and education that is focused on the appropriate use of medications by older adults. This mission is a means to target disease states early on in medical-based careers in order to help healthcare professionals work on preventative measures to decrease the frequency of chronic health conditions with aging.
