

DRAKE IS GREEN

COMPOST YOUR FOOD WASTE!

AN INITIATIVE OF DEAL AND THE SPROUT GARDEN

WHAT CAN WE COMPOST?*

YES: Produce waste (such as banana peels and apple cores), coffee grounds or loose tea, washed eggshells, as well as bread and tortillas.

NO: Paper products (such as napkins and paper cups), meat or dairy products, glass, metal, aluminum, plastic, or cooked food waste.

**Because the Sprout Garden does not have an industrial compost, there are things that Google says can be composted that our program cannot handle, such as paper products.*
